USER MANUAL

SWEEPER

CONGRATULATIONS

on your purchase of The Sweeper, our classic chorus pedal for the bass guitar.

The Sweeper is a premium-quality chorus pedal custom engineered for the BASS ONLY. This means that no matter what rate or depth you set, you'll get a phenomenal-sounding chorus effect – in stereo. The Sweeper is intuitively designed and easy to use. Just turn the page to get started.

BACK TO BASSICS

The Sweeper has everything you need to get the full range of classic bass chorus sounds – using just a few simple controls.

DEPTH controls the amount of chorus effect. Turn it down for a subtle chorus, crank it up for that great full sweep.

Use the **RATE** control to set the speed of your sweep. A fast rate combined with a low depth level gives you a light shimmering sound, while the slower rate and higher depth creates a dramatic chorus effect.

VOLUME controls the overall output of The Sweeper, and the INPUT

LEVEL on the side of the unit helps you avoid overdrive distortion by turning down the input signal. If the red overload light comes on, the input level is too high.

Note: If you're in the studio or have a stereo live setup, try using The Sweeper's stereo outputs for a truly mind-blowing stereo chorus!
